Students understand Earth resources. They know that Earth's resources are air, water, plants, animals, soil, and rocks. They know that these things are living and non-living things that are a part of Earth. Students understand how soil helps plants grow and how rocks and minerals are used to meet our needs.

Using Earth's Resources - BetterLesson

The reading guide offered reminders to students to refer explicitly to the text as they worked. After I modeled answering the first two questions in the guide, I completed the rest of the page with students. Asking students to underline the answers to the questions forced them to rely on the text for the answers.
