Package com.mks.api Description Provides classes and interfaces for connecting in an abstract way to an Integrity Client or Integrity Server (either local or remote), and for constructing and executing commands over the connection.

com.mks.api (Integrity Java API 4.12.4301)

We use MKS Integrity for our source control. I have no control over that -- I just have to use it. What are some "gotchas" that I should know about and avoid? And, are there any neat things about the software that will allow me to use it better? I've already hit cases where the tree structure in the source

control doesn't match that in my sandbox.
