Scientific Colonialism A Crosscultural Comparison

Internal colonialism theory suggests that a combination of uneven industrialization and cultural differences among regions in core nations cause ethnic grievances to become the basis of enduring political contention. In this view, the sources of ethnic solidarity include uneven regional development that reinforces or creates inequality, dependence on external or international investment, and an occupational structure that is highly segregated along ethnic lines.

Colonialism - an overview | ScienceDirect Topics

Although psychocultural constructs such as acculturation, ethnic identity, and collective self-esteem have become foundational concepts in cultural and cross-cultural psychology, discussions about how larger sociopolitical conditions, especially oppressive or colonial ones, may play a role in shaping such cultural constructs have been scarce.

Colonialism and Psychology of Culture - Nancy Abelmann

D. Increased cross-cultural interactions resulted in the diffusion of literary, artistic, and cultural traditions. E. Increased cross-cultural interactions also resulted in the diffusion of scientific and technological traditions. em IV. There was continued diffusion of crops and pathogens throughout the Eastern Hemisphere along the trade routes.

Modern colonial science. Since the formal end of colonialism, we have become better at recognizing how scientific expertise has come from many different countries and ethnicities. Yet former ...

Science Still Bears the Fingerprints of Colonialism ...

Abstract. A distinctive feature in the rise of colonialism was the transformation of knowledge production from Theology to science. Knowledge production went from an exercise in search for the truth in the Holy Script to a discovery of the laws of nature and society and man’s ability to understand these laws.

Scientific Colonialism: The Eurocentric Approach to ...

Douglas M. Peers and Nandini Gooptu note that "Most scholars of colonial science in India now prefer to stress the ways in which science and technology worked in the service of colonialism, as both a 'tool of empire' in the practical sense and as a vehicle for cultural imperialism. In other words, science developed in India in ways that reflected colonial priorities, tending to benefit Europeans at the expense of Indians, while remaining dependent on and subservient to scientific authorities ...

Cultural imperialism - Wikipedia
