Dissertation UNSUPERVISED INDEXING OF MEDLINE ARTICLES ...

Indexing for MEDLINE Introduction: What do we index? MEDLINE indexers describe the content of biomedical articles by assigning subject terms to them. These subject terms are selected from the controlled vocabulary, Medical Subject Headings (MeSH). The MeSH terms assigned to an article appear on the bibliographic citation in PUBMED.

Indexing for MEDLINE

UNSUPERVISED INDEXING OF MEDLINE ARTICLES THROUGH GRAPH-BASED RANKING . By Jorge R. Herskovic. Download PDF (2 MB) Abstract. The biomedical literature is extensively catalogued and indexed in MEDLINE. MEDLINE indexing is done by trained human indexers, who identify the most important concepts in each article, and is expensive and inconsistent.

UNSUPERVISED INDEXING OF MEDLINE ARTICLES THROUGH GRAPH ...

Not currently indexed for MEDLINE. Only citations for author manuscripts are included. PubMed: Selected citations only. Every article published in the journal will be indexed in PubMed but not in Medline. In order to be included in Medline, a journal has to undergo a rather rigorous and selective review process.

Confirming that a Journal is Indexed in Medline and/or ...

Before MEDLINE indexing begins, NLM must have a mechanism for creating the journal's citations and must have access to the journal's articles. Journal Citation Data: It is required that a journal will provide its citation and abstract data as XML-tagged data to NLM; this rapidly increases the public availability of citations and abstracts in ...

About MEDLINE® and PubMed®: The Resources Guide

Journals currently indexed in MEDLINE from electronic (online) version Note: This search includes journals that have both print and online versions but are indexed from the electronic version as well as journals that exist in electronic format only. Journals currently indexed in MEDLINE that are electronic-only format, i.e., no print counterpart

MEDLINE Journals Indexed from the Online Version

IM was a comprehensive bibliographic index of scientific journal articles related to medical science, in print form, published between 1879 and 2004. NLM began computerizing indexing work in 1960 and called it MEDLARS, a bibliographic database, which later became MEDLINE. Thus, IM became the print presentation of MEDLINE databases content.

What is indexing - PubMed Central (PMC)

Finding resources: MEDLINE. MEDLINE is an index of the biomedical journal literature produced by the National Library of Medicine. Nearly 5,000 journals are read and their individual articles indexed and added to the MEDLINE database, which contains information about over 12 million journal articles.

Using MEDLINE to find health science journal articles

For indexing in MEDLINE, NLM currently selects publications that it considers to be journals. NLM uses some general guidelines to decide whether a publication is a journal: Publication must have an ISSN; Publication content is issued over time under a common title; Publication is a collection of articles by different authors

database of citations and abstracts. To show up in search results on PubMed your journal needs to be submitted to either MEDLINE or PMC or both. There is no application for PubMed — citations, abstracts, and links to full-text articles are pulled from MEDLINE, PMC, and the NCBI Bookshelf.. P MC was launched in 2000 and is a free ...

How to Get Your Articles Indexed in PubMed: The Go-To

...

MEDLINE is an abbreviation for Medical Literature Analysis and Retrieval System Online. It is a bibliographic database containing over 18 million citations to journal articles in the biomedical domain which is maintained by NLM. Currently, the citations come from approximately 5,400 journals in 39 different languages starting from 1947.

Exploiting MeSH indexing in MEDLINE to generate a data set ...

Thus assigning MeSH terms to articles is a routine task for the indexing staff at NLM. This is empirically shown to be a complex task with 48% consistency because it heavily relies on indexers' understanding of the article and their familiarity with the MeSH vocabulary [1]. As such, the manual indexing task takes a significant amount of time leading
